

Why Consider **Gage Control.com** Software?

Are you uncertain about the reliability and appearance of your current gage calibration system (Index Cards, Word Documents or an Excel Spreadsheet)?

Why cling to an inflexible and untrustworthy homegrown system when you can be utilizing a software program that will continue to satisfy the gage calibration and test equipment management needs of your growing business?

***Gage Control Software** eliminates the opportunities for errors or admissions—stop worrying about things slipping through the cracks.*

*Does it make sense for your small to medium sized business to use a software program designed for a Fortune 500 company? Just compare software: our user interface is **INTUITIVE AND ECONOMICAL**—it is **NOT** overloaded with repetitive buttons and confusing tabs.*

*"It's so easy to use, even I can use it. I never used a software program before, and I never imagined how much time **Gage Control** is saving me.*

***Gage Control** did an excellent job converting our current data - they did all the work! We have over three thousand gages and **Gage Control** makes everything much easier."*

-Fred Danser: Vegas Fastener Manufacturing

Gage Control.comTM

The Easy, Simple, No Stress Solution

Affordable gage calibration and test equipment management software for the 21st century

Gage Control.comTM

Technical Support:

Gage Control's technical support staff is uniquely qualified to answer questions on every aspect of the software. Support services provide personalized phone support to expedite training and problem resolution. Our support staff has a background in calibration and is aware of the importance of reducing downtime.

On-Site Training:

Our on-site consultants are ready to help you once you have the software in hand! Our people are experienced in test equipment calibration and test equipment management. They also have been trained to analyze your business and offer solutions tailored for your specific company. Why try to reinvent the wheel? **We strongly suggest you consider on-site training.**

Data Conversion Services:

Gage Control: Gage Calibration Management Software offers data conversion services to our customers. We will be able to convert your data and provide you with a customized database at no charge.

Gage Control.com™

The Easy, Simple, No Stress Solution

Gage Control Software is the easy, simple, no stress solution for your gage and test equipment inventory management and calibration tracking needs. Our software's impressive capabilities not only ensure your gage inventory is in compliance

and always audit-ready: **Gage Control**

Software's effectiveness can be a key sales tool that demonstrates your company's dedication to continuous improvement!!

Gage Control Highlights:

- Gage Control Software is ISO 9000, ISO-ANSI 17025, and AS 9100 compliant.
- Our reports and unique **DEEP BLUE** inquiry screen allow for comprehensive inquiry/reporting capabilities: calibration history, audit trails, location change tracking, and traceability to the National Standard.
- Increase efficiency by generating barcode labels directly to label printers.
- Go PAPERLESS!!—scan and attach calibration procedures and outside calibration certifications directly to the software.
- **Gage Control Software** allows for multiple concurrent users and utilizes a SQL Server database.
- Copy/Clone gages to save time and ensure continuity
- Our user-manual and all implementation documentation are thorough, intuitive and easy-to-understand.

Test equipment management software for the 21st century

The Deep Blue Inquiry Screen/Report Generator:

Edit	Calibrate	Gage ID	Status	Date of Next Calibration	Description	Type	Size	Information	Offsite Location

The Deep Blue Inquiry Screen/Report Generator—is a dynamic and powerful search application that allows your operators to search, locate, and organize gage and test equipment information quickly and easily.

The Transfer Overview screen:

The Transfer Overview screen—is an important tool your operators will use to manage your gage's physical location.

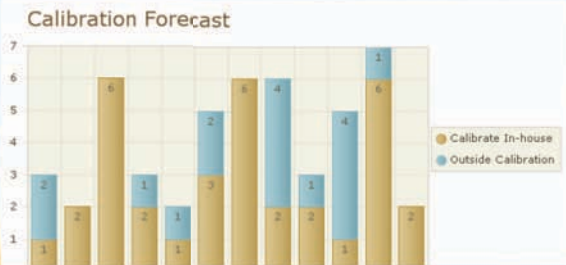

Do your gages disappear into thin air?

Gage Control Software's powerful Transfer Module will allow you to locate 100% of your gages 100% of the time!

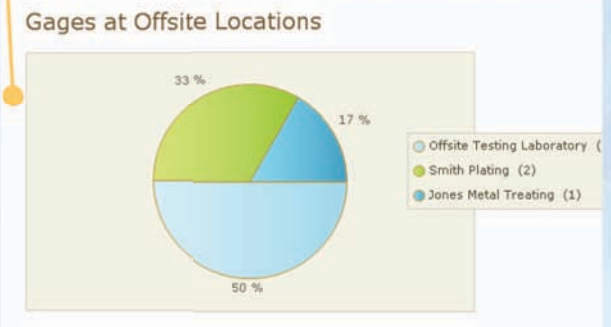

A limited budget doesn't mean you have to compromise on quality. **Gage Control Software** is a powerful and affordable gage calibration management application designed to help small and medium sized manufacturers control their gages and test equipment inventory and allow for quicker and more accurate calibration.

MORE UNIQUE AND POWERFUL FEATURES:

The Calibration Forecast—allows you to view an estimate of the number for gages that require calibration by month—for 12 months in the future.

Gages at Offsite Locations—displays gages that have been transferred to your customers (e.g. plating services) or gages sent to an outside service to be calibrated.

Other software companies say their product is the easiest to use; Our software is the easiest to use.
